

TEST REPORT

CLIENT:	West Coast Rubber, LLC	REPORT NUMBER:	48748B
	1501 Lana Way	LAB TEST NUMBER:	2176-3134
	Hollister, CA 95023	DATE:	July 15, 2010

TEST MATERIAL:

Identification		
GroundRubber Play (loose fill recycled rubber mulch) Compacted to 9" depth		
Greater tables in the food in		

INTRODUCTION: Testing Services Inc was instructed by the client, to perform ADA wheelchair

accessibility for the above test material being used under and around

playground equipment.

TEST METHOD: ASTM F1951-09b: Standard Specification for Determination of

Accessibility of Surface Systems Under and Around Playground

Equipment

REQUIREMENT: A surface in place shall have average work per foot (work per meter) values for

straight propulsion and for turning, *less* than the average work per foot (work per meter) values for straight propulsion and for turning, respectively, on a

hard, smooth, surface with a grade of 1:14 (7.1 %).

PROCEDURE: Test Surface Preparation: Tests were conducted on July 7, 2010 indoors at TSi

Laboratories in an environment of 89°F and 46% R.H. The rubber mulch was installed in a wooden box (44"W x 117"L x 9" Thick). The system, prior to testing, was

slightly compacted using a water-filled lawn roller to simulate foot traffic.

Wheelchair/Operator: The wheelchair used in these tests was manufactured by *Invcare*, Model Action Xtra, serial Number 98J84142. This wheelchair is totally adjustable, a necessity for these tests. The pneumatic tires were inflated to 60 psi on the rear and 32 psi on the front. The weight of the wheelchair was 24.25 pounds and the operator's weight was 165 pounds for a total of 189 pounds. The operator's distribution was adjusted to 60% on the rear wheels and 40 % on the front.

Torque Measuring System: A certified *Dillion Electronic Force Gauge*, Model BFG 500N, S/N 98-2277-07 was used as an interface between a *Dell* Laptop and a certified *Dillon Smart Torque Wrench*, S/N 97-0085-01. Software, also from Dillon, logged the load vs. time and integrated the area under the resulting curves. The adapters and accessories needed to attach the instrumentation were fabricated locally. This total package added 10 pounds to the total weight bringing the total to 199 pounds.

Attachment to Report # 48748B

West Coast Rubber, LLC 1501 Lana Way Hollister, CA 95023 Page 2 of 2

TEST RESULTS:

Straight Line Propulsion

Baseline Straight (Average Work/ft-Force)	GroundRubber Play Straight (Average Work/ft-Force)			
14.86 lbs	13.44 lbs			

Turning Propulsion

Baseline Turning (Average Work/ft-Force)	GroundRubber Play Turning (Average Work/ft-Force)			
10.36 lbs	9.33 lbs			

CONCLUSION:	The above test material <i>meets/exceeds</i> both the straight line and turning propulsion requirements set forth in this test method and therefore, passes the standard.
